

## Activity for North Korea

### *Sam Pal Sun*

Sam Pal Sun is the name of the border between North and South Korea. The game is played with five or more players on each team. One team has a flag, placed on the ground behind the defending team, which they need to keep the other team from reaching. Each defending team member has a “territory” they must defend and can’t move away from. The offensive team tries to get through the defending line without getting tagged. If tagged, that player must freeze until unfrozen by a teammate. If all offensive players are tagged, the game ends and restarts until they capture the flag. The flag then becomes theirs and they must defend it from the opposite team. This takes teamwork, strategy, speed, and agility!
